# WHAT IS FORMULATECH HACKS?

## Where Innovation Meets Speed

FormulaTech Hacks represents a fusion of motorsport passion with fast-paced, hands-on skill building. Our distinctive hackathon format challenges participants to address industry problems in motorsport under pressure. This year, students can compete in one of our three Safety Tracks, and combine software, hardware, and CAD skills to build their projects!

## Driving Big Ideas Forward

We believe in the power of sponsorship to turn bold ideas into reality. By contributing your organization's expertise, offering mentorship, and professional development opportunities, you enable hackers to turn ideas into practical solutions that address real motorsport challenges.

# INSTITUTIONAL SUPPORT

FormulaTech Hacks is proud to be awarded funding from the University of Waterloo's Math Endowment Fund and Student Life Endowment fund, competitive programs that support high-impact student initiatives. This backing highlights the credibility of our work and the university's confidence in our vision.

# ABOUT US

FormulaTech Hacks creates an energizing space where motorsport enthusiasts can thrive, fostering an environment that accelerates learning and ignites passion for the sport. Our hackathon runs on Waterloo University's campus and is organized by a student-led team with you in mind.

## Building the FormulaTech Grid

This is not your typical hackathon. Sponsors capture the moment with participants, while hackers get the opportunity to work on live industry challenges. Connect with the next wave of tech students passionate about motorsports and engineering.

## MEET THE CO-CHAIRS

Maira Khawaja

Marwa Zaryab

## Students turned Innovators

At the University of Waterloo, we are engineering students and racing enthusiasts who see motorsport as the ultimate stage where remarkable engineering fuels leading technology. With your support, we aim to empower students to gain hands-on experience and take their first step into the industry.
